

Online “Education Conference on One Health for Food Safety, Agriculture, and Animal Health” scheduled for January 30 – February 10, 2023

## **Discussion Session 2: Building an Interdisciplinary Collaboration Group**

### **1. Present Your Research:**

Each person in your group will share :

- 1) Your understanding of the problem.
- 2) Answers to questions from the last discussion.

### **2. Discussion:**

As a group, please discuss the following questions. Record your team’s thoughts and ideas and be prepared to share your answers with all the teams at the end of this session.

One Health emphasizes interdisciplinary cooperation, which is an approach to address public safety issues. Assuming that you are an interdisciplinary collaborative group, to solve the problem, you need to discuss the following questions:

- 1) What disciplines do you need in your group? Such as veterinarians, food scientists, environmental scientists, media, etc.
- 2) What role does each discipline play in solving the problem?

After the discussion, you need to choose one discipline you represent. Each of the individuals in your group should represent a different discipline. Then, you will do research and answer the following questions:

- 1) The relevance of each profession to the problem you need to address.
- 2) What research do experts need to contribute to the problem you need to address?

### **3. Essay Task**

Please write an essay on how you think the discipline you represent solves the problem (No more than 250 words).

**Deadline:** Turn your essay into your group facilitator via email by **Saturday, February 4 (GMT +8:00)**.
